2-3 MINUTE SURVEY

Bricks: Focus and Digital Distraction Study

A short, friendly survey designed to collect honest behavior and purchase signals - not polite guesses.

Google Forms setup: Make every question required unless it is marked Optional. Use section branching for the private-beta contact section as described on the final page.

Prepared as a copy-ready question guide

Form title and introduction

Copy this text into the title and description fields in Google Forms.

Form title

Bricks: Focus and Digital Distraction Study

Form description

A quick, 2-3 minute reality check on phone distraction during work and study.

First, think about your most recent important focus session. Then you will see an early product concept called Bricks. There are no right answers - honest specifics are the useful part.

Bricks is an experimental Android product, not a medical device. Contact details are requested only if you ask to join the private beta.

Confirmation message

Done - thank you. Your honest answers are much more useful than perfect-looking ones.

Section 1 of 3 - Quick context

Three taps, then we get to the interesting bit.

1. Which best describes you right now?

- University student
- School or college student
- Freelancer
- Remote employee
- Office employee
- Business owner
- Teacher or trainer
- Other

2. What kind of task were you doing?

- Programming or technical work
- Writing or research
- Designing or video editing
- University study
- Exam preparation
- Administrative or office work
- Client communication
- Teaching
- Other

3. What phone do you mainly use?

- Android with NFC
- Android without NFC
- Android - not sure about NFC
- iPhone
- Other

Section 2 of 3 - Your last focus session

Think about your most recent important hour of work or study - not your best day and not your worst.

4. In that hour, how many times did you open your phone without planning to?

- 0 times
- 1-2 times
- 3-5 times
- 6-10 times
- More than 10 times
- Not sure

5. Did any quick phone check last longer than you meant it to?

- No
- Yes, once
- Yes, more than once
- Not sure

6. After a phone check, how long did it feel like it took to get fully back into the task?

- Immediately
- Less than 5 minutes
- 5-15 minutes
- More than 15 minutes
- I did not return to the task
- Not sure

This is the respondent's estimate, not a measured recovery time.

7. Which app pulled you away most?

- Instagram
- TikTok
- YouTube
- WhatsApp
- Facebook
- X/Twitter
- Snapchat
- Games
- News
- Email
- Another app
- None during that session

Section 2 continued

Keep using the same recent focus session for Question 8.

8. How much did phone distraction affect that session?

- 1 = No effect 2 3 4 5 = A major effect

9. What have you relied on most to reduce phone distraction?

- Do Not Disturb
- Digital Wellbeing / Screen Time
- An app blocker
- A timer or Pomodoro
- Putting the phone elsewhere
- Turning the phone off
- A physical focus device
- Nothing yet
- Something else

10. When you really want a blocked app, what usually happens?

- I wait until the session ends
- I disable the blocker
- I use an emergency bypass
- I switch to another device
- I do not use a blocker
- It depends

Section 3 of 3 - Meet Bricks

Show the concept description before asking the remaining questions.

Concept description

Bricks is an early Android focus product paired with a physical NFC object. You tap the Brick to block chosen apps, then return and tap it again to unlock them.

It can stay on your desk or sit farther away to add a deliberate pause. Bricks does not guarantee improved productivity or health outcomes.

11. Compared with a software-only blocker, how useful would the physical Brick be to you?

- 1 = Much less useful 2 3 4 5 = Much more useful

12. If the Brick were 5-20 steps away, what would most likely happen?

- I would unlock less often
- It would make no difference
- I would find it annoying but still use it
- I would stop using Bricks
- Not sure

13. Would that short walk feel useful or annoying?

- Useful pause
- Mostly useful
- Neither
- Mostly annoying
- Very annoying
- It depends

14. Where would you realistically keep it?

- On my desk
- On a nearby shelf
- Across the room
- Near the door
- In another room
- I would carry it
- I would not use it
- Not sure

Section 3 continued

Ask for the honest objection before discussing price.

15. What is your biggest concern about Bricks?

- Urgent access
- Losing or forgetting it
- NFC reliability
- Accessibility permission
- Privacy
- Battery use
- Android-only availability
- Carrying another object
- Price
- No major concern
- Something else

16. If Bricks worked reliably, how likely would you be to buy it?

- 1 = Definitely would not 2 3 4 5 = Definitely would

17. What feels like a reasonable one-time price for the Brick and Android app?

- Under Rs1,500
- Rs1,500-1,999
- Rs2,000-2,499
- Rs2,500-2,999
- Rs3,000-3,499
- Rs3,500 or more
- Free only
- Not sure

18. At a Founder price of Rs2,499 plus delivery, what is your honest reaction?

- I would buy it
- I would probably buy it after testing
- I might buy it
- Probably not
- Definitely not

Final questions

No payment is collected by this survey.

19. After a successful test, would you consider a refundable Rs1,000 reservation deposit?

- Yes
- Maybe
- No

State clearly: this question collects no payment and creates no obligation.

20. Would you like to test the private Android beta?

- Yes
- Maybe later
- No

Private beta contact section

In Google Forms, send **Yes** to this contact section. Send **Maybe later** and **No** directly to Question 21. After the contact section, continue to Question 21.

A. Name (Optional)

Short answer.

B. Email address

Required in this section. Use email-address validation.

C. WhatsApp number (Optional)

Include country code, for example +92.

D. Contact consent

- I agree to be contacted about Bricks research, beta testing and future availability.

Required in this section. Use a checkbox question.

Final question for everyone

21. One last thing: what would you change about Bricks? (Optional)

Paragraph response.
